SUJAN BHATTARAI

Santa Barbara, CA, 8052841113 | sujan@ucsb.edu |LinkedIn | GitHub

PROFILE

Data science and Machine learning experience, economics and social science experience / Keen problem solver and analytical thinker/ Entrepreneurial mindset / Thrive in innovative environments/

KEY ACCOMPLISHMENTS

- ✓ Conducted the first-ever psychrometric study on the impacts of climate rise on snow precipitations in the mountains of Nepal(logistic regression)
- ✓ Self-taught Data Analyst, Programmer and Statistician, had to do this to solve money problem during my Undergrad
- ✓ Witnessed massive health epidemic in Nepal and started health blog (Website)
- ✓ Awarded Data Science Fellowship from UC Santa Barbara
- ✓ Winner in problem-solving competition in student exchange program in Japan

EDUCATION

Masters in Environmental Data Science@University of California Santa Barbara, CA Exp: June 2024

Awards**:** Data Science Fellowship

Teaching Assistant at Earth Science Department (fall quarter)

Student research assistant at UCSB Earth Research Institute

Highlighted Coursework: Machine Learning, Sentiment Analysis, Data Visualization, Bash Scripting, Applied statistics, Python and R programming, Cloud computing

Bachelor in Research Degree @University of Northampton, NAAMI college, Nepal 2018-2022

Awards: Academic Excellence award, GRADE: First-class/First-class

WORK EXPERIENCE

Data analyst | Nimble Clinical Research | kathmandu, Nepal Oct 2022-August 2023

- Conducted clinical data analysis using R, SAS, and SQL programming, constructed data pipelines to facilitate comprehensive statistical assessments with teams from US and India
- Expertly crafted FDA-compliant clinical reports adhering to the SDTMIG protocol, an established FDA standard for clinical data, enhancing innovative drug studies

Climate Data Analysis Intern | Small Earth Nepal | Kathmandu, Nepal Nov 2021- Sept 2023

- Gathered and reanalyzed climate data using R and independently conducted climate change research using statistical methods such as Changepoint detection, A/B testing, trend analysis, and Logarithmic mapping.
- Provided valuable assistance to junior research team members by offering support in their data analysis, R programming, data visualization, and report writing

Environmental Economics Research Intern | KIAS | Kathmandu, Nepal June 2021- Sept 2022

- Conducted a comprehensive nationwide study at the intersection of environmental and economic concerns, assessing the impact of the COVID-induced biodiversity crisis in Nepal
- Spearheaded nationwide first-hand data collection, interviewing 150+ political representatives, offering insights into the multifaceted impacts of the COVID-induced biodiversity crisis in forest economics

PROJECTS

- **Study of Snowfall Fraction in the High Himalayas using psychrometric energy balance method**
  Tool: R, Link

- **Predict and forecast global energy consumption, integrating a basic classification algorithm.**
  Tool: R, Link

CERTIFICATIONS

Data scientist and Analyst with R/ Professional SAS certification/ GITHUB certification/ Python programming/Geospatial Data science/ Mathematics for Machine Learning/ Machine Learning with scikit-learn, Tensorflow(ongoing)

LEADERSHIP AND AFFILIATION

1. UCSB Data Science Club, 2023
2. UCSB Intramural Soccer Team, 2023
3. UCSB Labor Union, 2023
4. AIESEC in Nepal, 2021-2022
5. TEDXNayaBazar, 2022
6. UNLEASH Innovation Labs, Alumni 2021
7. Asia Pacific Innovation Challenge, Alumni 2021, 2022
8. Nepal Entrepreneurship Education Foundation, Alumni 2018
